

A Seamless, Frictionless, Cashless Self-Service Checkout Solution

The new Hyosung JetCheck X solution achieves a frictionless shopping experience while maximizing operational efficiency for any sized retailer with its easy to use, customizable UI/UX.

Features

UI and Design

The customer-oriented UI design of the Hyosung Self-Checkout provides a host of tools to guarantee a seamless and frictionless shopping experience. With step-by-step guidelines and visuals, customers always know what to do next.

The JetCheck X allows retailers who want to protect their original point-of-sale investments but are looking for new self-checkout hardware to effortlessly integrate with their current system.

Customer-Oriented Functionality

JetCheck X is designed for credit card and mobile shoppers and includes an embedded biopic scale, and the option of a security scale within the bagging station to better facilitate the purchase process by measuring product weights and automatically adjusting the price at checkout.

For Retailers needing a robust, cashless self-service checkout solution. The sleek design, configurable bagging shelves, allows the Hyosung Self-Checkout to not only be installed in any store format, but also ensures maximum efficiency of store space.

Refined Expertise in Manufacturing

The Hyosung Self-Checkout incorporates design and engineering expertise acquired from over four decades manufacturing comprehensive financial service solutions to guarantee quality performance and ergonomics.
